Executive Summary

Initial Meeting Recap

- Our Understanding: The City of Elliot Lake has transformed from a historic mining town to a popular tourist, recreational destination, and retirement community. Like many Ontario Municipalities, Elliot Lake finds itself in a unique position with aging infrastructure, large capital projects underway or needing to be scheduled (pool, arena etc.) and the supply chain challenges and price increases impacting their budgeting. Recent tax increases of 6.5% have helped, but more is needed to fund the necessary projects as well as begin to rebuild reserves. They currently operate a fleet of approximately 30 vehicles to help carry out municipal functions.
- Acquisition: The Municipality uses the Bids and Tenders process to procure vehicles currently. Last few years some bids went unfulfilled or were delayed. Are open to various manufacturers, however locally in town have Ford, GM, and Chrysler dealership currently.
- **Funding:** All light duty vehicles are purchased out right based on annual budget allowances. Capital Budget approval will dictate the allowance for new vehicle purchases. No current financing or leasing strategies being utilized, however, would be open to these alternatives if it saved money.
- **Maintenance:** Maintenance of the light duty fleet can be handled on-site through the two mechanics on staff. Options for offsite service exist at local dealerships or service centers. Currently do not use any telematics devices in the fleet but would be open to learning more about this.
- **Resale:** Currently using Gov Deals for resale. Have held vehicles longer recently due to budget restrictions and supply chain challenges so little value remains at re-sale currently.
- **Cycle Philosophy:** Current not using a consistent cycle strategy for vehicle replacement. Units can be held as long as 10-12 years depending on the unit and the department using it. Council approval of capital budget will dictate if units can be added or replaced to the fleet.

EFFECTIVE VEHICLE LIFECYCLE

CONFIGENTIAL AND PROPRIETARY

Key Observations

- Depreciation/year declines over time
- Running costs of Fuel and Maintenance increase gradually over time
- Mandated MPG efficiencies reward staying on technology wave

* Lease Rates are conservative estimates

"Estimated Current Fleet Equity is based on the current fleet "sight unseen"

and can be adjusted after physical inspection

Lease Maintenace costs are exclusive of tires unless noted on the lease rate quote.

KEY OBJECTIVES

Lower average age of the fleet

42% of the current light and medium duty fleet is over 10 years old Resale of the aging fleet is significantly reduced

Reduce operating costs

Newer vehicles have a significantly lower maintenance expense Newer vehicles have increased fuel efficiency with new technology implementations

Maintain a manageable vehicle budget

Challenged by inconsistent yearly budgets

Currently vehicle budget is underfunded

Operating Expenses – Maintenance

Full Maintenance

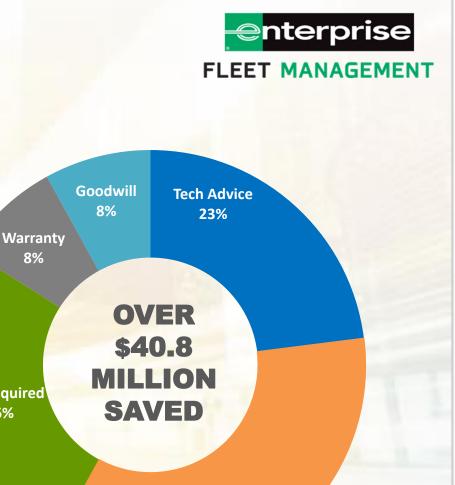

- Fixed monthly rate & inflation proof for entire lease term up to 160,000km
- Takes customer out of managing maintenance entirely
- Includes: 24/7 Roadside, all major and minor repairs

Maintenance Management

- "Bridge" program for currently owned fleet vehicles
- Seamless experience for field drivers

Enterprise National Service Department

- 200 Employees with over 1,100⁺ total ASE certifications
- 400,000⁺ vehicles under management on this program
- \$40.8 million in customer savings in 2021
- \$3.5 million in post warranty/goodwill refunded to our customers in 2021 CONFIGENTIAL AND PROPRIETARY
